

# Eco-School Project

Dear Parents/Carers,

As part of the Eco-School project we would like to build a bottle greenhouse. In order to create this bottle greenhouse, we need lots of clean, plastic 2 litre bottles. We would be grateful for any 2 litre bottles you could bring in to school to support us with this project!

For the project we also need wood to build a frame, bamboo canes and cable ties for the structure and large sheets of bubble wrap for insulation. If anybody is able to provide us with any of these materials, then we would be extremely grateful.

We would also be grateful for a little helping hand in building the greenhouse. If anybody is an expert in DIY and would like to give us a helping hand, please send an email to [zoe.griffiths@st-nicholas.staffs.sch.uk](mailto:zoe.griffiths@st-nicholas.staffs.sch.uk).

Many Thanks for your support.

Miss Griffiths and the School Council/Eco Committee.
