First School

Our Curriculum Aims linked to Online Safety

A Head, Heart, Hands, Health approach to learning and personal development

Head

Preparing our children with knowledge and skills to become safe, responsible and happy users of digital technology.

Hands

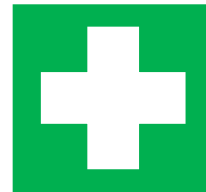

Developing hands-on skills and knowledge, to enable our children to explore risks in safe environments using simulations.

Heart

Promoting our children's love for technology, and how it opens a gateway to the wider world. It will instil a real sense of pride of what has been achieved through digital technology, whilst recognising a real sense of opportunity of how they can make impact.

Health

Equipping our children to recognise how they can help to keep themselves happy, healthy and safe by making the right, positive choices when they are online.
