

Eco-School

Your Eco
Reps are...

Year 1 – Zach, River

Year 2 – Athena, Sophia

Year 3 – Bethan, Tommy, Savannah, Bella

Year 4 – Theo, Darcy

The three topics that we are going to focus on this year are...

Biodiversity

Marine

School Grounds

Biodiversity

Biodiversity is all about maintaining a high level of plant, insect and animal life locally and globally.

Things we could do:

- ❖ Create a nature area with a variety of different plants to attract the insects.
- ❖ Create areas within the nature area for different creatures e.g. bug hotels, bird bath, bird feeders, wildflowers for the bees, hedgehog homes, mini pond for frogs etc.
- ❖ Grow our own fruits and vegetables and use them in cooking lessons.
- ❖ Have a lesson outside where we record nature e.g. bird watch.

Do you have any ideas that could help us?

Marine

Protecting and conserving water-based ecosystems.

Things we could do:

- ❖ Do a survey of single use plastic that is used in school and see if we can swap any of these for reusable items.
- ❖ Take part in a river/canal/beach clean up.
- ❖ Have a lesson about how to protect the ocean and make posters.
- ❖ Create a marine themed display using recycled materials.
- ❖ Support a marine based charity.

Do you have any ideas that could help us?

School Grounds

Improving School Grounds for students, staff, plants, insects and animals.

Things we could do:

- ❖ Create the nature area linked with biodiversity.
- ❖ Work with the school council on their playground project.
- ❖ Each classroom could have an indoor plant to look after.
- ❖ Plant more trees.
- ❖ Have more lessons based outside.
- ❖ Create a more purposeful outdoor learning space.

Do you have any ideas that could help us?
